
MOSQUITO NETS BUZZ UP THE LOOK OF THE ROOM AT BALI'S HOTEL/VILLA.

Monday, 24 November 2008

Bali is surely Island of Paradise or Island with thousand temples, these days Bali Island is crowded with hotels & villas. According to Bali's government number of rooms from licensed hotels & villas in Bali around 60.000 rooms and keep growing…?. But we are not talking about how to sell these rooms aren't we? One thing I noticed that new hotel or new villa maybe not all of them but mostly like to add mosquito net to their bedroom. Bring more value to the bedroom looks and protected from mosquito bites in this tropical Island. Where's all type of mosquito bites become an important issue after rainy season (October – April) in Bali. Need to buzz up your bedroom decorated with mosquito net of your own choice ; rectangular, circular, colorful or just neutral white pick one.
